Connections Guide

1 Aerial Connections
   - Connect the cable from the satellite dish to LNB IN.

2 Digital A/V Output Connections
   - Connect the HDMI Cable to the HDMI Connector of your TV.
   - Connect SPDIF to Digital audio input of the equipment (Digital Audio)
# Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| **No or Bad Signal** | For Satellite tuner module  
- Check the LNB: Replace the LNB if necessary.  
- Check the cable from the LNB.  
- Check the position of the dish; realign dish if necessary.  
- If you are using a DISEqC 1.0 switch, check that you have connected and programmed the LNBs to the correct connections on the switch.  
**Common features for all types of DVB receivers**  
- Check the 'Signal Level' and the 'Signal Quality'. |
| **Poor picture quality** |  
- See 'No Picture' above.  
- Check the signal level, if this is low then try adjusting the alignment of your dish. |
| **No Picture** |  
- See *Does not display any message on the front panel* above.  
- To match the STB system with your TV system (PAL/NTSC), press V/Format button until a picture is displayed.  
- Check the video output port is firmly connected to the TV or VCR.  
- Check that you have selected the Video Input on your TV.  
- Check the brightness level of the TV.  
- Check the resolution that your TV supports, and set the proper resolution with the remote Resolution button to obtain a picture. |
| **Does not display any message on the front panel.** |  
- Check the main power cable and check that it is plugged into a suitable power outlet. |
| **No Sound** |  
- See 'No Picture' above.  
- Check the volume level of the TV and STB.  
- Check the Mute status of the TV and STB. |
| **Remote Control does not operate** |  
- Point remote control directly towards the STB.  
- Check that the STB button lights up when you press any button.  
- Check and replace batteries. |
